

Local Lead Generation

Net Services USA, LLC is a company virtually working 100% online. Net Services USA, LLC was founded in 2002 and has operated online since the very beginning. **We are located in the Denver Metro Area.** We are actively doing online marketing in many different niches using different marketing techniques to drive visitors to websites and to convert them into buyers.

Net Services USA, LLC wants to provide you with local sales leads.

The Denver Metro Area presents tremendous opportunity for your Business to gain new client leads online. More and more people are using the Internet to find local businesses. Unless you are actively working online your business is missing out on many customers and ultimately losing sales.

Online marketing is the key to growing your business. Over 80% of consumers start their search for a new product or service on the Internet. Social networking sites like Facebook now have over 600 million members. We plan to leverage search and social networking to drive qualified leads to your business. Internet users turn into leads and it is critical for local businesses to adjust accordingly.

Net Services USA, LLC provides leads generation services to businesses like yours. We have the knowledge and experience to deliver new customers from the Internet.

The sales leads we send you are potential customers that have expressed an interest in products and services offered by your business and have taken the steps to fill out a web form or to call you. The ball is then in your court to do what you do best and sell them on your business and products and to close the deal!

Our Marketing Plan

We plan to market your business aggressively online to generate the maximum amount of targeted local leads. At our own cost we will purchase paid traffic ads on Google, Yahoo, Bing and Facebook to get started. Clicks from those ads will be sent to a customized landing page designed to funnel potential customers through the lead form. Those leads will then be transmitted to your company for processing.

In addition we can set up a special phone number for customers to call you. This phone number will track all calls generated by our advertising campaigns, and will be charged as a lead. We have found many businesses are able to convert these phone calls into sales even more effectively than web based leads.

What does it cost?

All marketing expenses are picked up by Net Services USA, LLC. We carry the entire risk of generating traffic and to send you sales leads. You only pay for the actual leads we send you.

Location matters

We know how to keep it local. Our advertising systems use sophisticated geo-targeting tools to make sure leads are coming from the exact areas that you designate. That means you get only customers from the location you know your best customers come from. No more leads in far away cities that have no chance of using your business.

Measurable Data

Tired of not really knowing how well, or if your advertising is working at all? Not with our system. Everything we do is trackable, and measurable down to the smallest detail. You will know exactly what the ROI for your lead purchases will be. When you hire Net Services USA, LLC we will work out a price per lead with you. You will know how much a sales lead is going to cost you.

Remember, once agreed on a cost per lead that is all you have to worry about. The risk of attracting customers within the available price per lead is ours. **If we do not deliver leads, your cost is zero.**

We can provide you with reports each month to help your business grow in addition to the new customers you are acquiring with our service.
